MPU-401
INTERFACE

MIF-C64

MIF-C64

MPU Interface MIF-C64 is for setting up the MPU-401 with the Commodore 64.

- Optional software is also necessary.

*Appropriate Computer
Commodore 64

■ How to set up

1. Make sure that the computer is turned off.

2. Insert the Interface board side to the Cartridge Slot at the rear of Commodore 64 as shown in Fig. 1.
   - See the user's manual of the computer.

3. Connect another end of the Connection Cable to the MPU-401. Here, be sure to tighten the screws for secure connection.
